

Lab – 01: Practicing HTML

Create a web page in HTML. The web client requires an html page exactly like the one sample given below. Also draw the table asked.

Objective:

- Using HTML knowledge learnt so far.

Submission:

- Submission of your work must be on Moodle.
- **Emailed submissions will NOT be accepted.**
- **Plagiarized work will not be marked.**

Task 1 – Create an HTML file with the name “aboutMe.html” about yourself with following information.

- Write your name as heading using **largest** heading tag on top of the page. In **small** braces, write the meaning of your name. Heading and sub-heading should be center aligned.
- Describe yourself very briefly using maximum 3 lines, using the paragraph tag. Highlight your name and age.
- Add your picture, set width to **300px**, under 'alt' attribute write your name. You may choose any reasonable picture from your PC or Web URL (if you don't have yours).
- Make an **unordered list** and list at least three things that you stand for or what makes you passionate.
- Make an **ordered list** and list at least your four of your hobbies.
- Use two headings for 'Matriculation or O/Levels' or 'Intermediate / A-Levels'. Write the institute/school's name and **list** down major subjects you studied.
- Insert an image, when the user clicks on it, it redirects you to a YouTube link to your favorite song.
- Use another heading i.e. "My Favorite Websites". List at least 3 websites that you often visit. Each website name should be a link, when the link is clicked, it shall open that website on the **same tab**.

Task 2 – Create an HTML file named “table.html” and make the following HTML table exactly as shown in the figure below.

Course Number	Course Title	Semester Taken
Spring 2016		
For Credit		
6.813	User Interface Design	Spring 2014
Listener		
6.034	Artificial Intelligence	Spring 2015
6.006	Introduction to Algorithms	Fall 2014

Task 3 – Create an HTML file named “form.html” and make the following HTML form exactly as shown in the figure below.
